

S4SUBMERGED PUMPS FOR 4" WELLS

DAB-S4B24M 240V Complete Pump + Control Box, 1.1kW, 1.5Hp, 24 Impellors, 4" diameter, Stainless Steel, 40 Litres minute at 48 metre head

Multistage, centrifugal, submerged motor-driven pumps for 4" wells or larger, able to generate a vast range of heads and flow rates.

They can be employed in a wide range of lifting, distributing and pressurising applications in civil and industrial water installations, supplying autoclaves and cisterns, fire fighting and washing systems, irrigation systems.

Constructional characteristics:

Base support and upper head in microcast AISI 304 stainless steel with steel check valve built into the head.

 $Two-pole, a synchronous \, submerged \, electric \, motor, built \, entirely \, in \, AISI \, 304 \, stainless \, steel.$

Franklin motor: stator encapsulated in synthetic resin with high quality dielectrics and fitted inside a hermetic stainless steel casing.

Dab motor: stator closed inside a sealed stainless steel casing filled with a mixture of ARGON-based inert gases.

Capacitor and manually resettable overload protection inside the panel supplied on request for single phase versions.

Protection for the three-phase version is the responsibility of the user.

Operating range: from 0.24 to 24 m³/h with heads up to 320 m. **Pumped liquid:** clean, free from solid or abrasive substances,

chemically neutral and close to the characteristics of water

Liquid temp. range: from 0° C to $+40^{\circ}$ C

Motor protection level: IP 58

Insulation class: B

Special versions on request: with different voltages and/or frequencies.

Maximum content of sand: 120 g/m³

The CONTROL BOX HS is available on request for the single phase version to increase the static torque.

Available with Dab Motor or Franklin Motor.
